SUMMARY

Information Systems undergraduate at Pelita Harapan University with a foundation in software development, object-oriented programming, database design and manipulation, web development, UI/UX design, and cybersecurity. Experienced in applying design thinking, developing academic software projects, and collaborating using software development and project management methodologies. Passionate about continuously learning, improving technical skills, and developing digital solutions.

EXPERIENCE

Software Design & Development (Academic Projects)

- Led the development of an object-oriented farming game in Unity featuring JSON save/load functionality and an in-game economy.
- Led the development of a responsive front-end e-commerce website for Neru Meru using HTML, CSS, JavaScript, and Bootstrap.
- Led the development of a PHP-based clothing retail website integrated with a relational database.
- Led the design and configuration of a Docker-based computer network enabling internet connectivity and inter-device communication.
- Collaborated in developing Sportify, a sports matching and social networking application.

Study Program Student Development Coordinator

- Planned and coordinated academic development programs, including peer tutoring sessions, a student talk show, and an academic project showcase.

Study Program Event Committee

- Documented study program events through photography and media coverage, collaborating with the committee to capture key activities and support event promotion and archival.
